Blessed G/Michael Catholic Secondary School

1st Semester **Geography final** examination for Grade 10th

Jan., **2018 E.C** **Time Allowed 45 min'**

Name Bitanya Wondmagegnehu **Section** 10th B **No** 12

I. Write 'True' if the statement is correct and write 'False' if the statement is incorrect.

True 1. The growth rate of the population is vital demographic features that can help us understand the Population change that a given society has undergone and will undertake in the future.

false 2. Africa and other developing regions make up an increasing share of the world population.

True 3. The world population has shown a tremendous increment from 1950 to 2020. Africa, Asia and Latin America/Caribbean contributes the highest proportion to the share.

True 4. Africa rapid population growth rate and short doubling time is the result of the very high fertility rate.

True 5. The Congo is the Earth's second- largest river by volume in the world. Whereas, the Nile is the Longest river in the world

II. Choose the best answer among the given alternatives.

C 1. Which of the following is NOT a characteristic of natural resources?

A. Derived from the environment
C. Evenly distributed across the globe
B. Essential for human survival
D. Can be renewable or non-renewable

C 2. What is the main difference between renewable and non-renewable resources?

A. Renewable resources are more important.
B. Non-renewable resources are more expensive.
C. Renewable resources can be replenished naturally, while non-renewable resources cannot.
D. Non-renewable resources are environmentally friendly

A 3. Why did the global human population keep growing at high rates starting from the 15th Century?

A. The advancements in medical science and economy
B. The need for more work force in agricultural activities
C. Growing interest in pro-natalist population policy
D. The genetic change in human reproduction system

B 4._____ is the highest water fall in Africa

A. Tis isat B. Victoria C. Tugela D. Chirombo

D 5. The second largest and most populous continent is____

A. Asia B. South America C. Europe D. Africa

A 6. Africa's fertility rate is the highest in the world due to all of the following factors, except:

A. High incidence of disease and infection
C. Influences from many religions
B. Low educational background of the people
D. Low status of women

A 7. Since 1939-1945, Africa's death rate has been declining because of:

A. The development of medical technology
C. The presence of tropical disease
B. Poor sanitary practice
D. Civil war and political instability

D 8. The Serengeti national Park is found in _____.

A. Uganda B. Zimbabwe C. Kenya D. Tanzania

D 9. What has led Africa to have faster population growth in the world?

A. Increased mortality rates.
C. Short life span and decreased mortality rate.
B. Increased emigration to outside.
D. high fertility rates.

B 10. A demographic variable which results as a decreasing factor for the number of people?

A. Immigration B. Mortality C. Fertility D. birth

A 11. What is the correct description for a population that doubled every 25 years in an average?

A. Sub- Saharan Countries
B. Countries with low crude birth rates
C. Countries with good economic activities.
D. Countries which are urbanized quickly.

B 12. If a population in a given country grows at an annual growth rate of 2 percent, How long does the population take to double?

A. 14 B. 35 C. 20 D. 24

A 13. Which one of the following is a purely non biological factor of population change?

A. Migration B. Fertility C. Mortality D. birth rate

C 14. Which factors of population change can have negative effect on population growth?

A. Emigration & Birth
B. Immigration & Birth
C. Emigration & Death
D. Death &Immigration

A 15. Among the following components, which are positive factors of population change?

A. Immigration and birth
B. Emigration and death
C. Immigration and emigration
D. Birth and death

A 16. Which one of the following may NOT be a cause for high fertility rate of population in Africa ?

A. late marriage B. low educational status B. religious imposition D. sex preference

A 17. Which one of the following demographic condition differentiates developed countries from the developing nations?

A. High life expectancy
B. High mortality rate
C. High crude birth rate
D. High crude death rate

C 18. Which of the following pairs of continents have contrasting population situations?

A. Europe and North America
B. Africa and Asia
C. Asia and Oceania
D Africa and Europe

A 19 The highest population concentration in the world is in _____.

A. Asia B. South America C. Europe D. Australia

B 20. What percentage of Ethiopia is covered by Vitosols?

A. 29.8% B. 12.5% C. 10% D. 7.8%

B 21. The Kalahari Desert is located in:

A. Northern Africa
B. Southern Africa
C. Eastern Africa
D. Western Africa

A 22. The Sahara Desert primarily consists of:

A. Sand dunes and rocky plateaus
B. Coastal plains
C. Tropical rainforests
D. Wetlands

C 23. Which mineral resource is abundant in the Democratic Republic of Congo?

A. Oil B. Gold C. Diamonds D. Copper

A 24. Lake Victoria is shared by which three countries?

A. Kenya, Uganda, Tanzania
B. Ethiopia, Sudan, Egypt
C. Nigeria, Cameroon, Chad
D. Botswana, Namibia, South Africa

A 25. What is the primary factor for high population growth in Africa?

A. High birth rates
B. High immigration rates
C. High life expectancy
D. Low mortality rates

C 26. Which African country has the largest population?

A. Ethiopia B. Egypt C. Nigeria D. Sudan.

A 27. Which demographic trend is common in Sub-Saharan Africa?

A. High fertility rates
B. High aging population
C. Low birth rates
D. Low dependency ratio

B 28. Which of the following statement is TRUE regarding doubling time and growth rate?

A. Population growth rate cannot determine doubling time
B. Short doubling time high population growth rate
C. Long doubling time high population growth rate
D. Short doubling time mean stagnant population growth

B 29. The high growth of the world population over the past centuries largely the result of; -

A. Absence of disease
B. Advancement in modern medicine
C. Less access to contraceptives
D. High status of women's

C 30. The Atlas Mountain system stretches across which group of North African countries?

A. Egypt, Libya, and Sudan
B. Mali, Niger, and Chad
C. Morocco, Algeria, and Tunisia
D. Mauritania, Senegal, and Gambia

C 31. Which of the following are possibly the most widespread types of natural vegetation in Africa?

A. Tropical Savannahs
B. Desert and Semi Desert vegetation
C. Tropical rainforest
D. Afro-Alpine vegetation

C 32. The Drakensberg Mountains are located in which part of Africa?

A. Northern Africa B. Southern Africa C. Western Africa D. Eastern Africa

B 33. Which of the following statements is NOT correct about the Tropical Rainforests of Africa?

A. They are largely confined to Central and Western Africa and Eastern Madagascar
B. They have significantly low species diversity light
C. They contain broad-leafed evergreen trees
D. They have little undergrowth as the canopy of the tall trees prevent the penetration light

A 34. The Savanna region differs from the Equatorial region mainly because:

A. It has colder temperatures all year round.
B. It is located near the equator.
C. It has higher annual rainfall and denser forests
D. It experiences seasonal rainfall with alternating wet and dry seasons.

A 35. The Tropical Rainforest climate is characterized by:

A. High temperature and rainfall throughout the year
B. Cool dry winters and hot summers
C. Dry conditions all year round
D. Alternating wet and dry seasons

D 36. Which sequence correctly arranges the following African regions from north to south?

A. Sahel → Sahara → Savanna → Atlas
B. Savanna → Sahel → Sahara → Atlas
C. Sahara → Atlas → Sahel → Savanna
D. Atlas → Sahara → Sahel → Savanna → South African Plateau

A 37. The line separating head streams which flow to different river system is called:

A. Watershed B. Confluence C. Distributaries D. Ridge

D 38. Annual ranges of temperature are largest in the:

A. Tropical zone B. Equatorial region C. Temperate zone D. Tropical hot desert

A 39. Which of the following shows renewable natural resource?

A. Solar energy, water and wind
B Metals, crude oil and natural gas
C. Plant, animal and minerals
D. crude oil wind energy and solar radiation

D 40. The short term state of atmosphere, including temperature, humidity, precipitation, wind and visil

A. humidity B, climate C. precipitation D, weather
