Blessed G/Michael Catholic Secondary School

1st Semester **HPE final** examination for Grade 10th

Jan., 2018 E.C

Time Allowed 25 min'

Name Bitanya Wondimageghelu Section 10mB No 12

I. Choose the best answer among a given alternatives

A 1. What is the advantage of warming-up exercises before performing a physical fitness test?

A. It helps to prevent injuries and prepares the body for the test

B. It makes the body stiff before the test

C. It interferes with testing factors

D. It has no effect on the physical fitness test

18

B 2. Grade 12 students recorded a mean BMI of 24 in the pre-test and 25 in the post-test. Based on this result, what can be concluded?

A. There is a positive effect

B. There is a negative effect

C. We cannot judge

D. There is no significant change

A 3. Which of the following is NOT a principle of physical fitness testing?

A. Overload B. Validity C. Reliability D. Specificity

AB 4. Which of the following statements is correct?

A. Lactic acid accumulates during long-duration exercise

B. Lactic acid accumulates during high-intensity, short-duration exercise

C. Physical fitness improves while work efficiency decreases

D. Muscle fibers build only during long-duration exercise

D 5. Male heart size is generally larger than female heart size. Because of this, which statement is true about males?

A. Blood is pumped more rapidly

B. Blood supply is not adequate per beat

C. Blood is pumped more slowly

D. They have a greater cardiac output

B 6. Which of the following is a skill-related physical fitness test?

A. Zipper test B. Illinois agility test C. 12m T-test D. Cooper test

B 7. Which of the following does NOT depend on physical performance ability?

A. Resting heart rate

B. Maximum heart rate

C. Target heart rate

D. Working heart rate

D 8. What is the advantage of physical fitness testing?

A. To analyze individual ability

B. To identify individual performance level

C. To determine appropriate exercise intensity

D. All of the above

DR 9. A group of speed students were short-distance runners. Which type of muscle fiber do they mainly have?

A. Red muscle fibers B. White muscle fibers

C. Slow-twitch muscle fibers D. Both A and B

AP 10. Which of the following is NOT recommended immediately after eating?

A. Sleeping B. Drinking tea C. Eating fruit D. All of the above

D 11. Which factor can affect the accuracy of a physical fitness test?

A. Environmental conditions B. Tester skill

C. Participant motivation D. All of the above

C 12. Which heart rate is used to control exercise intensity during training?

A. Resting heart rate B. Maximum heart rate

C. Target heart rate D. Recovery heart rate

A 13. _____ is the principle that ensures test results are consistent.

A. Reliability B. Validity C. Objectivity D. Specificity

A 14. Which one of the following statements is true about the relationship between exercise and energy systems?

A. Endurance exercise requires the aerobic energy system

B. All skill-related physical fitness requires the aerobic energy system

C. All health-related physical fitness requires the anaerobic energy system

D. All are correct

II. Match the words or phrases under column 'B' with the appropriate items Under column 'A'

A (Test)	B (Fitness Component)
A 15. Zipper test	A. Flexibility
B 16. T-test	B. Agility
C 17. Skinfold test	C. Body fat level
D 18. 30 m sprint test	D. Speed
E 19. Cooper test	E. Cardiovascular endurance

III. Give the short answer

20. According to physical fitness guidelines, how do you rehabilitate a person with Type 2 diabetes?(3points)

1st. know the goal of the person
2nd. know the current performance
3rd. design a training. since the person have Type 2 diabets the intensity should be 40-60% and the exercise should be C.V.E
4th. Fulfill equipment
5th. Adjust a program 3 days/week for 30 minutes
6th. follow the program
7th. re evaluate.
