Excellent

Blessed G/Michael Catholic Secondary School

1st Semester Biology Test One for Grade 10th

Oct, 2018 E.C Time Allowed 40 min'

Name: Bitanya Wondimagegnehu Sec: 10th B R.No. 12

Instruction I, Matching

Match column A with column B

Column A	Column B
F 1. Apiculture	A . F.Banting
E 2. .sericulture	B .J France
J 3. Poultry	C . L.Pasteur
D 4. Psiculture	D .Applied biology that studies fish
H 5. Vitamins	E .Applied biology that studies silk
A 6. Insulin	F . Applieed biology that studies bees
B 7. Vaccination	G .Palentology
I 8. Study of cells	H .F.Hopkins
G 9. .study of fossils	I .Cytology
C 10. Father of medical microbiology	J Applied biology that studies chicken
K 11. Embryonic root	K .Radicle
L 12. Embryonic shoot	L.Plumle
M 13. Embryonic leaf	M..cotyledon
	N .R .koch

Instruction II ; Choose the best answer among the given alternatives

D C 1. Which fields of biology helps to the investigation of crime by comparing the DNA that is found during the scene of the crime to that of the suspects ?

A. .Genetic engineering C .Biomedical engineering

B. Bioinformatics D .Forensic science

C 2. Which one of the following fields of Biology is concerned with altering the genetic make up of an organism by transferring a gene from one organism into another ?

A. Biomedical engineering C .Genetic engineering

B. Forensic science D .Environmental management

C C 3. Dr Aklilu Lemma Ethiopian renowned Biologist discovered ?

A. .Resistance of sorghum resistant striga weed

B. The vaccine against the terrible cattle disease rinderpest

C. Endod that kills the vector of schistosomiasis

D. Impacts of chemical hazards on the environment

B C 4. The leaf like structure protecting the lower parts of female and male reproductive structures is ?

A. Petals B .Sepals C .Stamens D .pistil

B 5. Which internal structure of the root is the site of origin of lateral roots ?

A .Pith B .Pericycle C .Endodermis D .cortex

A 6. The internal structure of a leaf that contains air spaces is ?

A Spongy mesophyll C .palsiade mesophyll

B. Upper epidermis D .Lower epidermis

B 7. The first part of the embryo that emerges out of a seed during germination is ?

A.Plumle B .radicle C .cotyledon D .micropyle

C 8. The term cell was coined by ?

A .Antonvanleuwenhoeck C .R.Hooke

B .R.Brown D .A.Weisman

C 9. Scientific disciplines involving Computer programs to collect,to analtyse,to store and to disseminate biological data is ?

A .biogeography C.bioinformatics

B .biophysics D .biomedical

A 10.In dicot stems vascular bundles are arranged regularly in the form of one or two rings

A True B .false

A 11.The outer most layer of a root is ?

A .Peliferous layer B .Cortex .C .Endodermis D .pericycle

A 12.In monocot seed endosperm is large and well developed ?

A .True B .false

A 13.Which type of germination commonly occurs in dicot seed ?

A. Epigeal B .hypogeal C .both D .none

B 14.Which one of the following is a food storage tissue in dicots ?

A .Endosperm B .cotyledon C .radicle D .plumle

A 15.Well developed pith is found in?

A monocot root and dicot stem C .dicot root and dicot stem

C. dicot root and monocot stem D .dicot and monocot stems

A 16.What is the function of the hypodermis in the sun flower stem?

A .mechanical support C .gaseous exchange

B .photosynthesis D .storage of food materials

D 17.Which of the following root tissues gives rise to secondary roots ?

A .cortex B .phloem C .epidermis D .Pericycle

B 18.Vascular bundles are scattered in ?

A. dicot stem C. bryophytes

B. monocot stem D. all
