Blessed G/Michael Catholic Secondary School

2nd Semester Biology test one for Grade 10th 28

May, 2018 E.C Time Allowed 40minutes

Name: Bilanya Wondimagegnehu Sec: 10th B R.No. 12

I. Match column A with column B

A	B
C 1. Brady cardia	A. Marfan's syndrome
B 2. Tachy cardia	B. Resting heart rate above normal above 100
A 3. Aortic disease	C. Resting heart rate below normal below 60
D 4. Ischemic stroke	D. caused by cerebral thrombosis
E 5. Haemorrhagic stroke	E. Caused by severe hypertension

I. Choose the best answer among the given alternatives.

C 6. Which chamber of the heart has the thickest muscular wall?

A. Left atrium B. Right atrium C. left ventricle D. Right ventricle

C 7. Blood transported by the pulmonary veins returns to the

A. Right atrium B. right ventricle C. left atrium D. left ventricle

B 8. The audible sounds/lub ,dupp. Sounds/ that can be heard from the heart are made by the heart

A. Nodes B. valves C. atria D. ventricles

C 9. Venous blood from the tissues and organs of the head, neck chest, shoulders and upper extremities is received by the

A. Jugular veins B. Subclavian vein C. superior venacava D. Inferior venacava

A 10. Which of the following is referred to as the pacemaker of the heart?

A. Sinoatrial node B. purkinje fibers C. Atrio ventricular node D. endocardium

C 11. The layer of simple squamous epithelial that lines the inside of the heart is called?

A. Myocardium B. pericardium C. Endocardium D. Epicardium

B 12. Oxygen,carbon dioxide, nutrients and wastes are exchange through the thin walls of the

A. Arteries B. capillaries C. veins D. venules

B 13. The way in which arteries of the pulmonary circuit differ from those of the system circuit is that

A. There is no difference C. They have a thicker tunica media

B. They carry deoxygenated blood D. They carry a greater proportion of the blood volume

B 14. Mother is Rh- (Rh⁻) negative and her new born is Rh- (Rh⁺) positive why is the baby's first pregnancy usually unaffected?

A. The baby is immune to anti D- antibodies

B. The mother does not produce antibodies until exposed during birth

C. The fetal RBCs are too small to enter maternal circulation.

D. Rh- positive blood cannot cross placenta

C 15. A patient with blood group O- requires an emergency transfusion. The most compatible donor is?

A. Opositive B. A negative C. O- negative D. AB- positive

A 16. What constitute the majority of the antibody mediated reaction to incompatible blood

A. Agglutination by IGH C. Hemolysis by IGE

B. Precipitation by IPG D. khagocytosis by igm

A 17. The heart valves have a double layer of _____ with layer of _____ in between

A. Endocardium , connective tissue C. Epicardium, endocardium

B. Epicardium, myocardium D. Myocardium, endocardium

A 18. The brachia cephalic artery extends from the aortic arch to supply blood to which region of the body?

A. Head, meek and arms B. chest C. legs and feet D. abdominal

B 19. Which of the following structures carries the most oxygenated blood?

A. Umbilical arteries B. umbilical veins C. Ductus venosus D. Ductus arteriosus

B 20. white blood cells also known as

A. Thrombocytes B. leukocytes C. Erythrocytes D. Hematocrits

B 21. Rank the following blood vessels in order of their average pressure from the highest to lowest?

A. Capillary → vein → venule → arteriole → artery → aorta

B. Aorta → artery → arteriole → capillary → venule → vein → venacava

C. Capillary → arteriole → venule → artery → vein → venacava

D. Aorta → arteriole → venule → artery → vein → capillary

A 22. Which one of the following cardio vascular diseases is caused by narrowing of coronary artery by plaque?

A. Heart failure B. arrhythmia C. heart attack D. pulmonary embolism

B 23. Which one of the following lymphatic organs is responsible for the maturation of T- lymphocytes?

A. spleen B. thymus C. tonsil D. Lymph nodes

D 24. Which one of the following lymphoid organs filters lymph

A. Thymus B. spleen C. Tonsil D. lymph nodes

B 25. Which one of the following blood groups is a universal recipient?

A. AB^- B. AB^+ C. O^+ D. O^-

26. The lymph node that is found around our groin is called Menstrual

27. The pressure that is exerted in the walls of arteries when the left ventricle contracts is called Systolic pressure

28. Agglutination is a condition where a blood clot forms in the circulatory system

29. a type of cancer that affects blood forming tissues is called Leukemia

30. The valve that is found between the right auricle and right ventricle is called Tricuspid Valve

31 .The amount of blood pumped by the heart per beat is called Cardiac Out Put (Stroke Volume)

32 .Another name of heart muscle disease is called Cardiomyopathy
