BLESSED G/MICHEAL CATHOLIC SECONDARY SCHOOL

1ST SEMISTER IT Final Exam For Grade 11

Time allowed 50 min

Name -Alubonis Mevale----------Section-11C- No 33

I. **Write True if the statement is correct and Write False if it is incorrect (1 point each)**

True 1. In a data model, an entity represents a real-world object.

True ② Virtual reality is used exclusively for entertainment purposes.

false 3. Information system is only about the technology, it does not involve people or processes.

false 4. Data inconsistency is one of the advantage of database approach data management.

True [redacted] ⑤ A primary key can uniquely identifies an attribute, .

F [redacted] ⑥ ERD is a graphical representation of attributes and their relationship within a database.

True 7. In a relational database, each entity is typically represented by a table.

[redacted] ⑧ In RDBMS, a table can have multiple primary key.

True 9. In a file based system there are no predefined relationship between different files.

True [redacted] ⑩ RDBMS and Data science are similar.

II. **Choose the best answer from the alternatives (1 point each)**

C 1. Which of the following is disadvantage of file based system compared to database systems?

A. Faster data retrieval
C. increased data redundancy
B. No need for specialized software
D. all

[redacted] ② What is the main advantage of database system over file based system?

A. Easier to maintain and back up
C. allow for high data redundancy
B. Facilitates queries and relationship between data
D. no need data manipulation

E 3. Which one of the following is components of information system?

A. Digital devices. B. DBMS C. IS user D. procedure E. all

E 4. All are advantage of e-commerce except--------------------

A. Can create more completion
C. convenience
E. none
B. Can avoid wholesalers
D. can crease bargaining power for customer

C 5. A database that contains a logically related set of tables is called -----------.

A. Data Model B. Database C. relational Database D. relational data model

[redacted] D 6. Data which can be post on social media are -------------

A. Semi structured B. structured C. Unstructured D. all

A 7. The data which stored in MS access with specific data types are ---------

A. Structured B. unstructured C. Semi structured D. none

1ST SEMISTER IT Final Exam For Grade 11

D 8. ------------provides the conceptual tools to represent a data model of a relational database.

A. ERD B. Data model C. foreign key D. relational Data model

A 9. An attribute in a table that matches the primary key of another table is ---------

A. Foreign key B. instance of an entity C. relationship D. primary key

C 10. What is the key difference between AR and VR

A. AR requires internet access, while VR doesn't

B. VR works only on mobile devices

C. VR is entirely immersive while AR adds digital element to the real word

D. AR requires a VR headset to function

A *11. Which one of the following is not characteristics of Big Data*

A. Varicose B. Velocity C. Variety D. Volume

A *12. What is the role of a Data scientist?*

A. Analyzing data to extract insights C. managing network

B. Writing operating system D. Designing computer hardware

E 13. *Which one of the following is not main component of E-learning?*

A. Content developer C. Computer E. none

B. Internet D. Digital learning resource

C 14. What is Machine learning?

A. Learn how to use machine* C. Subset of AI *that learn from data*

B. Manual data analysis D. learn how robotics are *functional* *E. all*

B 15. Which one of the following can be an example of entity

A. Employee Salary C. Employee Address

B. Bank Account D. Employee Nation Id

1ST SEMISTER IT Final Exam For Grade 11

III. Match column "A" with correct correspondence from column " B"(1.5 points each)

A	B
E 1. Entities	A. is one complete set of data values for an entity -record
G 2. Attributes	B. huge data with exponential growth rate
A 3. Instance [illegible]	C. an association of two or more entities
D 4. Data type	D. Specify what kind of value a field can hold
C 5. Foreign key	E. real world object stored in database
B 6. Big data	F. ensures that no two records are the same
F 7. Primary key	G. properties of an entities
	H. maintain referential integrity
	I. form, report and query

IV. Work answer

1. Blessed G/Michael Catholic School wants to develop a database to manage teachers, students and courses. The students are described by sno, sname, age, sex and payment. The teacher also described by Teacher ID, Name, sex, salary, age and specialization. The school wants to keep track its subject information as subject id, subject name, and author and contact_hr. The student can take different courses, a teacher can teach only one course and can advise many students. Identify the entity, attribute, and relationship then Draw ERD for data model of BGC School. (5 points).

32/40

ANSWER SHEET

Name Alubamis Mesale --------Section- 11C No 23

I. True or False				7	True
				8	[illegible] True
1	True	4	False	9	True
2	True x	5	True x	10	True x
3	False	6	[illegible] True x		

5

II. Multiple choice

1	C	5	C	9	A	13.	E
2	B	6	D x	10	C	14.	C
3	E	7	A	11	A	15.	B
4	E	8	D	12	A		

14

III. Matching

1	E	3	A	5	C x	7	F
2	G	4	D	6	B		

9

IV.

Entity - Students
- Courses
- Subject

Attribute - Student
- S no
- S name
- age
- sex
- payment

Teacher
- Teacher Id
- name
- sex
- salary
- age
- specialization

Course
- subject id
- subject name
- [illegible] author
- contact_hr

Relationship

1. students can take different course
   (1) One to many
2. Teacher teach only 1 subject
   (1) One to One
3. Teacher advice many students
   (1) One to many
