Blessed G/Michael Catholic Secondary School

1st Semester Agriculture Test One for Grade 11th

Oct, 2018 E.C

Time Allowed: 40 min.

Name: Aluhamis Menale Sec: C R.No. 33

Part I: - Choose the best answer from the given alternative

A 1. Which of the following agricultural activities correctly ordered?

A. Sowing → preparing soil → adding fertilizer → weeding → storage

B. Preparing soil → adding fertilizer → weeding → sowing → storage

C. Prepare soil → sowing → adding fertilizer → weeding → storage

D. Sowing → adding fertilizer → weeding → prepare soil → storage

D 2. Which of the following is NOT true about the basic practices of crop production?

A. Sowing B. Adding manure C. weed protection D. husbandry E. all

B 3. Which of the following legume crops is an important export crop in Ethiopia?

A. Field pea B. Haricot bean C. Faba bean D. Lentil

B 4. Which of the following food crops are not the major cereal crops in Ethiopia?

A. Barely B. Oat C. Maize D. Wheat

D 5. What are the useful features hunter-gathers considered in their plant selection?

A. Wide availability B. High amount of yield C. Easy of harvest D. A&C E. A&B

D 6. One of the following crops used to make cloths and textile industry?

A. Sugar crops B. Oil crops C. Food crops D. Fibre crops

B 7. When the land is continuously cultivated, which type of agriculture is practiced?

A. Shifting cultivation B. Settled agriculture C. Subsistence farming D. Mixed farming

D 8. Which of the following statement is true about pulse crops?

A. The soil may be cultivated two or three times before planting

B. Pulse crops are do not require planting distance

C. The altitude range of Faba bean 1200 m to 2800 m. 1800 - 3000

D. The immature pods are used as vegetables

D 9. Which of the following crops are true about the beneficial features of maize plants?

A. When the seeds are does not shatter C. When the seeds are covered by husk

B. It gives high yield compared to others D. All E. none

E 10. Which of the following cereal crops do not require planting distance?

A. *Triticum aestivum* B. *Hordeum vulgare* C. *Eragrostis abyissinica* D. all E. none

barley = 25,5 wheat 25 5 Tef.

E 11. The crop gives reasonable yields on soils that are too poor for other crops. Which one is it?

A. Maize B. Barley C. Noug D. Haricot bean E. none

D 12. The second crop is planted after the first crop has grown alone for a certain period is known as---------

A. Crop rotation B. Intercropping C. Mono cropping D. none

E 13. Why are the national average crop yield in Ethiopia are low?

A. Soil degradation B. Low fertilizer use C. Climate change D. low irrigation E. all

B 14. What is the main reason for using (manure) fertilizers in crop production?

A. To prevent pests B. To increase crop yield C. To reduce labour cost D. to conserve water

B 15. Which of the following cereal crops are true?

A. *Teff* can grow in wide range of environments including high fertility soils

B. *Teff* performs well on loam and clay soils

C. For maize plant 30 kg nitrogen and 25 kg phosphorus per hectare

D. The altitude range of sorghum between 500 and 100 meters above the sea level

A 16. Which of the following is not true about oil crops production?

A. *Noug* is commonly sown by row planting C. *Noug* is very competitive against weed

B. Sesame crops require arid and lowland areas D. both *noug* and sesame are shatter crops

D 17. Which of the following cereal crops adapted to mid altitude areas?

A. Wheat B. Sorghum C. Barley D. Maize E. None

E 18. Which of the following filed crops do not require synthetic fertilizer?

A. haricot bean B. soybean C. Corn D. Faba bean E. except C

C 19. ----------is growing two or more crops simultaneously on the same piece of land.

A. Rotational cropping B. Mono cropping C. Mixed cropping D. none

D 20. Which one of these is not a major factor used in the selection of crops for domestication?

A. Disease resistance B. Good flavour C. high yield D. Susceptible to crop pests

C 21. Which of the following cereal crops grown in midland agroecology?

E A. wheat B. Barley C. Maize D. Sorghum E. all

22. All of the following are examples of oil crops in Ethiopia except?

A. Sesame B. Sunflower C. linseed D. Soy bean E. None

Part II: - Match items under column A with items under column B

Column A	Column B
D 23. Earthling up	A. prepare trench for the protection of potato plants
G 24. Atrazine	B. Parasitic weed for *noug*
A 25. Porcupine	C. Reduce soil acidity``
C 26. Kitchen ash	D. Support soil around the plants
E 27. Sesame	E. Margarine
B 28. Dodder	f. Parasitic weed for sorghum -striga
	G. Before the weeds emerge above ground
	H. After the weed emerged above ground

Part III: - Answer the following question (1 pts each)

29. List at least 2 common insects that attack maize plants?
maize stalk borer, and---aphids---

30. How much nitrogen and phosphorus fertilizer recommended for sorghum plants?
---32 Kg N, and ---10 Kg P--, respectively?
