Blessed G/Michael Catholic Secondary School

Web Design and Development

Examination for Grade 11th

February, 2018 E.C **Time Allowed: 90'**

Semester I **Exam cover:-Module I Unit 1 and 2** **Exam weight 75%**

Name Nahom Menale **NO** 33 **Section** C

I. Write true if the statement is correct and false if it is incorrect.

F 1. Scanner and Projector is an example of input device. (input, output)

F 2. Front-end developer work with programming language like php.

F 3. A peripheral is a piece of computer hardware that is added to a computer in order to reduce its abilities.

F 4. Motherboard is the "brain" of the computer and performs most of the processing. (CPU)

T 5. Database is one of the key aspects of back-end development.

T 6. One of the key advantages of computers is their ability to automate repetitive tasks.

T 7. Electrostatic Discharge is a sudden flow of electricity between two objects caused by a static charge imbalance.

T 8. VGA ports are older analog video ports used for connecting computers to displays.

T 9. Audio port, allows for the connection of headphone, speaker and microphone.

F 10. Display Ports are used to connect the computer to a power source.

F 11. RAM is none volatile memory that provides permanently storage for data and instructions.

F 12. CPU is the main circuit board that connects and allows communication between all the components of the computer system.

F 13. Mainframe computer is a largest type of computer.

T 14. Control unit is used for managing instructions and data flow.

T 15. Reliability is the measure of how consistently and accurately the computer system performs its intended functions.

T 16. The ability of the computer system to accommodate changes in workload or resource demands is called Scalabilit

II. Choose the best answer from the given alternatives.

A 17. A software program that manages the computer's resources, controls hardware operations, and provides a user interface is called____.

A. Operating system. B. Language software. C. Application software D. A and B

A 18. The ability of the computer system to work efficiently with different hardware, software, or data formats is called_____.

A. Compatibility. B. Scalability. C. Reliability D. Security

A 19. Which one of the following fire safety guideline use surge protectors and avoid overloading electrical outlets?

A. Electrical safety B. Proper ventilation. C. Reporting hazards D. Fire extinguisher awareness

A 20. Sit with your back straight, feet flat on the floor, and wrists in a neutral position and adjust your chair, desk and monitor height while working at computer to ensure_____.

A. Comfortable and ergonomic setup.
C. Use reputable antivirus software
B. Create strong and unique passwords.
D. All

C 21._____ is a programming language that adds interactivity and dynamic behavior to web pages.

A. Html B. CSS C. JavaScript D None

C 22. Which one of the following is used by front-end developers to structure the content of web page?

A. CSS B. JavaScript C.HTML D None

D 23. Which one of the following is not expansion card?

A. Graphics cards B. Network interface cards. C. Sound cards D. None

D 24. Which one of the following is a common type of storage device?

A. hard disk drives (HDDs) B. Optical drives (CD/DVD) C. solid-state drives (SSDs) D. All

D 25. Which one of the following is input device?

A. Webcams B. Scanner and microphones. C. Fingerprint readers D. All

D 26. Which one of the following programming language is not used by full stack development?

A. Html and CSS. B. PHP and Java. C. JavaScript and python D. None

D 27. Which one of the following is the security mechanism of computer?

A. Encryption and authentication B. Antivirus software. C. firewalls D. All

D 28. Which one of the following is not the role of IT Project Manager?

A. Plan B. Manage technology projects. C. Execute D. None

D 29. Take regular breaks from computer work to prevent _____.

A. Eye strain. B. Musculoskeletal issues. C. Fatigue D. All

D 30. Which one of the following is an accessibility guideline?

A. Use semantic markup.
C. Provide alternative text for images
B. Ensure keyboard navigation is available.
D. All

D 31._____is used to ensure optimal visibility and reduce eye strain, by adjust display settings of your computer.

A. Brightness B. Contrast. C. Font size D. All

D 32. Which one of the following PCI cards used in PCs?

A. Network cards. B. Modems and extra ports C. Sound cards D. All

A 33. A short-term drop in voltage, typically caused by sudden increases in power demand or faults in the power distribution system is called_____.

A. Voltage Sag B. Voltage Interruption C. Voltage Surge D. Voltage Spike

A 34. Remove noise and interference from the power supply to protect sensitive equipment from electrical disturbance is called_____.

A. Power Filters B. UPS C. Voltage regulators. D. Line conditioners.

A 35.____is a systems that provide backup power during outages and protect against voltage sags, surges and interruptions.

A. UPS B. Power Filters. C. Voltage regulators. D. Line conditioners.

A 36.____is used to regulate voltage, filter out noise, and provide surge protection to ensure clean and stable power supply to sensitive equipment.

A. Line conditioners B. Voltage regulators. C. UPS D. Surge Protectors

C 37. What is the importance of safe work conditions and procedures?

A. To protect computer equipment from ESD. C. To ensure personal safety when working with computers

B. To prevent environmental damage. D. To dispose of computer equipment properly

A 38. What is the purpose of computer ports and cables?

A. To connect peripherals and devices to a computer C. To dispose of computer equipment properly

B. To protect the computer from power fluctuations. D. To prevent environmental damage

B 39. Which one of the following is different from the other?

A. Digital computer B. Special purpose computer C. Analog computer D. Hybrid computer

B 40. Second Generation computers utilized_____.

A. Integrated circuits B. Transistors (2nd) C. vacuum tubes (1st) D. Microprocessors (4th)

B 41. The devices that absorb excess voltage spikes and redirect them away from connected equipment, which one?

A. UPS B. Surge Protectors C. Line conditioners D. Voltage regulators.

A 42. _____can design and manage databases, handle server operations, and integrate APIs.

A. Back-End Developer B. Full-Stack Developer C. Front-End Developer D. Web Designer

A 43. Vacuum tube is a circuits that used by _____generation.

A. First B. Third C. Second D. Fourth

A 44. _____can Coordinate with content creators and stakeholders to publish engaging content.

A. Content manager B. Full-Stack Developer C. User Experience (UX) Designer D. Web Designer

B 45. _____has ability to handle the entire web development process and provide end-to-end solution.

A. Back-End Developer B. Full-Stack Developer C. Front-End Developer D. Web Designer

B 46. Computers are highly accurate when it comes to executing instructions and performing calculations is called___.

A. Storage Capacity B. Accuracy C. Versatility D. Speed

B 47. What is the purpose of power protection devices?

A. To connect computer peripherals C. To dispose of computer procedures equipment properly

B. To protect against power fluctuations D. To classify computers based on their generation

B 48. A complete loss of power supply for a brief period due to faults, outages, or tripped circuit breakers is called___.

A. Voltage Sag B. Voltage Interruption C. Voltage Surge D. Voltage Spike

B 49. Which one of the following is different from the other?

A. supper computer B. General Purpose C. Mainframe computer D. Mini computer

C 50. A brief increase in voltage, often caused by lightning strikes, switching operations, or faults in the power grid

A. Voltage Sag B. Voltage Interruption C. Voltage Surge D. Voltage Spike

C 51. _____can programmed to perform various tasks and handle different types of data.

A. Storage Capacity B. Accuracy C. Versatility D. Speed

C 52.____ is stabilizes the incoming voltage to ensure a steady supply to connected equipment, compensating for voltage sags and surges.

A. UPS B. Line conditioners. C. Voltage regulators. D. Surge Protectors

C 53. Which one of the following is used to implement the visual and interactive elements of a website?

A. Back-End Developer B. Full-Stack Developer C. Front-End Developer D. Web Designer

C 54._____can Conduct user research and usability testing to optimize website usability.

A. Content manager B. Full-Stack Developer C. User Experience (UX) Designer D. Web Designer

D 55. A rapid increase in voltage that lasts for a short duration, usually caused by switching off high-powered electrica devices or sudden load change is called_____.

A. Voltage Sag B. Voltage Interruption C. Voltage Surge D. Voltage Spike

D 56. Which of the following is NOT part of the introduction to computers?

A. Introduction to computer hardware. C. Characteristics of computer systems

B. Generation of computers D. Types of computer viruses

A 57. How can you connect hardware peripherals to a computer?

A. Using computer ports and cables. C. Using proper disposal

B. Using fire safety guidelines D. Using ESD protection measures

D 58. Which one of the following is output device?

A. Keyboard B. printer C. Speaker D. B and C

D 59. Which one of the following is the key component of a computer system?

A. Central processing unit B. input devices C. output devices D. All

D 60. Computers are characterized by the development of artificial intelligence is called____ generation.

A. First B. Third C. Second D. Fifth

B 61. Which one of the following is type of computer is used for insert/display only continuous data?

A. digital computer C. hybrid computers

B. Analog computer D. None

D 62. ____can work closely with clients to understand their design requirements.

A. Back-End Developer B. Full-Stack Developer C. Front-End Developer D. Web Designer

B 63. _____avoid placing items on top of or around computer equipment, because that could block air and cause overheating.

A. Electrical safety. B. Proper ventilation C. Reporting hazards D. Fire extinguisher awareness

D 64.  The name of this picture represented _____.

A. Printer B. Scanner C. Projector D. None

III. Matching Column A with column B

Part one

65. Grounding. G
66. Design and develop software applications. E
67. Analyze and interpret data to derive insights. F
68. No smoking policy D
69. Design, implement, and maintain computer networks B
70. Manage and maintain computer systems and servers C
71. Protect computer systems and networks from security threats. H
72. Provide technical assistance and support to users. A

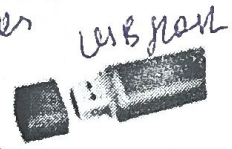

A. IT Support Specialist
B. Network Administrator
C. System Administrator
D. Fire Safety Guideline
E. Software Developer
F. Data Analyst..
G. ESD Protection
H. Cyber security Analyst

A.

B.

C.

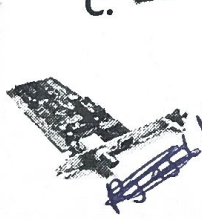

D.

E.

F.

G.

H.

Part two question 72-80 match the appropriate name with the corresponding image above.

73. Graphic cads E
74. RAM D
75. Network Card G
76. USB flash C
77. Monitor B
78. Router A
79. PS/2 Ports H
80. USB Connectors F

20/20 100

Excellent
