Blessed G/Michael Catholic Secondary School

First Semester Agriculture final exam for Grade 12th

January, 2018 E.C Time allowed 40

Hanna Ayalew

Part I: - Choose the best answer from the given alternatives.

D 1. What is the primary consideration when designing ventilation system for animal housing?

A. Energy efficiency ✓ C. Noise reduction ✗

B. Aesthetic appeal ✗ D. Air quality and temperature control ✓

D 2. Which one is NOT true about East-West-direction of farm animal housing?

A. Shade all time in a day ✓ C. more manure dropped ✓

B. feed consumption increase ✓ D. to dry the floor area ✗ N-S

C 3. Which of the following beef cattle traits are quantitative?

A. Marbling score ✗ B. fat thickness ✗ C. carcass weight ✓ D. all E. none

D 4. Which of the following is NOT correct about the selection criteria of beef cattle?

A. Disease and heat tolerance ✓ B. Foraging ability ✓ C. Fast growth rate ✓ D. udder structure ✗ E. all

A 5. Which of the following is a parasitic disease for beef cattle?

A. mastitis ✓ B. Trypanosomasis ✗ C. Brucellosis ✗ D. Coccidiosis ✗

C 6. Which of the following is an example of external parasites of beef cattle?

A. Tape worm ✗ B. Liver fluke ✗ C. mite ✓ D. round worm ✗

B 7. Identify false statement about non-infectious disease of farm animals?

A. Non- infectious diseases are not caused by pathogens ✓

B. Anthrax, FMD and Newcastle diseases are examples of non-infectious disease ✗

C. Non infectious diseases cannot be passed from animal to animal ✓

D. Non infectious diseases may be caused by hereditary factors. ✓

D 8. The benefits of tissue culture in crop production are:-

A. to produce uniform plants ✓ C. to produce multiple plants in the absence of seed ✓

B. produce plant free from disease ✓ D. All E. none

B 9. The capability of a single plant cell to regenerate into a whole plant is called:

A. Differentiation B. Totipotency C. Aseptic condition D. Morphogenesis

D 10. One major advantage of genetic engineering in plant breeding is:

A. Increased crop yield ✓ C. Reduced need for pesticide ✓

B. Increased nutrient composition ✓ D All E. none

B 11. Dressing percentage in beef cattle refers to:

A. Live weight gain ✗ C. Fat percentage in meat ✗

B. Carcass weight relative to live weight ✓ D. Bone-to-muscle ratio ✗

B 12. Which nutrient is most important for muscle development in beef cattle?

A. Mineral B. Protein C. Vitamin D. Water

C 13. The most characteristic symptom of FMD in beef cattle, which one is it?

A. High fever B. Swelling of joints C. Vesicles in mouth and on feet D. Bloody diarrhoea

B 14. The best method to control infectious beef cattle diseases, which one is it?

A. Antibiotic treatment B. Vaccination and biosecurity C. Herbal treatment D. Increased feeding

B 15. Which of the following is the most common mode of transmission of rabies disease in beef cattle?

A. Airborne route B. Bite of infected animal C. Contaminated feed D. Insect bite

B 16. Exotic breeds are more susceptible to which problem in tropical regions?

A. Cold stress B. Heat stress C. Nutrient deficiency D. Genetic mutation

B 17. Which of the following statements is true about beef cattle?

A. Tropical breeds produce more meat than exotic breeds C. Exotic breeds need less care

B. Tropical breeds have better disease resistance D Exotic breeds are more heat tolerant

C 18. Which of the following beef cattle disease are caused by Mycoplasma mycoides?

A. Tuberculosis B. Bovine viral diarrhoea C. Pneumonia D. Blackleg

C 19. Which of the following is the most effective control method for tick-borne diseases in beef cattle?

A. Antibiotics B. Vaccination against all parasites C. Regular acaricide treatment D. Pasture irrigation

D 20. Which of the following is true about disease prevention and control methods?

A. Pasture management C. Diagnosis and treatment

B. Use of resistant cattle breeds D. Vaccination

Part II:-Match items under column A with items under column B

Column A	Column B
F 21. Feedlot/finishing	A. Angus and Hereford breed
A 22. Bos taurus	B. Brahman and Afrikander
G 23. Trypanosomiasis	C. Bacterial disease causing muscle necrosis and sudden
C 24. Blackleg	D. Viral disease causing vesicles in mouth and feet
D 25. Foot and mouth disease.	E. Liver fluke infection causing anaemia and weight loss
B 26.Bos indicus	F. High-energy feeding to rapidly increase weight before slaughter
	G. Protozoal disease transmitted by tsetse flies

Part III: - In the following questions fill the blank space provided. (2pts each)

27. Auxins and cytokines are plant hormones that responsible for----------and ----------respectively.

28. ----------&----------drugs are to treat contagious bovine pleuropneumonia disease in beef cattle.

Answer Sheet

Name Henna Ayalew Section 12th C No 24

1. D	6. C	11. B	16. B	21. F
2. D	7. B	12. B	17. B	22. A
3. C	8. D	13. C	18. C	23. G
4. D	9. B	14. B/A	19. C	24. C
5. B	10. D	15. B	20. A/D	25. D

26. B

27. Root and Shoot.

28. Tylosin and danofloxan.
