A. B_2C_2D B. BCD_4 C. B_2C_3D D. BCD_7

IV. Reading Comprehension

Common Cold and Flu

Scratchy throats, stuffy noses and body aches all spell misery, but being able to tell if the cause is a cold or flu may make a difference in how long the flu lasts. That's because the prescription drugs available for the flu need to be taken soon after the illness sets in although the symptoms can be eased with over the counter medications. As for colds, the sooner a person starts taking over-the-counter remedy, the sooner relief will come. Cold symptoms such as stuffy nose, runny nose and scratchy throat typically develop gradually, and adults and teens often do not get a fever. On the other hand, fever is one of the characteristic features of the flu for all ages. And in general, flu symptoms including fever and chills, sore throat and body aches come on suddenly and are more severe than cold symptoms.
