1st Semester Agriculture Test One for Grade 12th

Oct, 2018 E.C

Time Allowed: 40 min.

Name: Hanna Ayalew Sec: 12[illegible]C R.No. 24

**Part I: Choose the best answer from the given alternatives.**

D 1. The major constraints of vegetable and fruit production in Ethiopia, Which one is it?
A. High consumption of vegetables C. Low cost of production inputs like fertilizers
B. Better management of vegetables D. small size of vegetable processing facilities

B 2. Which vegetable crops are commonly grown as a cool season crop?
A. Tomato B. lettuce C. Cucumber D. Eggplants

B 3. Which of the following fruit crop is most commonly grown in tropical and sub-tropical climates?
A. Apple B. Mango C. Cherry D. Peach E. B&C

B 4. Which of the following fruits is classified as a Climacteric fruits?
A. Mango B. Grapes C. Lemon D. Orange

D 5. Which of the following fruit crops require high humidity and temperature to thrive?
A. Grape B. Apple C. Peach D. Papaya

6. Which of the following is the most common methods of propagated fruit trees?
A. Seed propagation B. Grafting C. layering D. Micro propagation

D 7. Among the following, which part of a fruit tree is commonly used in vegetative propagation?
A. Roots B. Flowers C. Leaves D. Stems

C 8. In Grafting technology, which part of is called the Scion?
A. The root stock B. The root system of the tree C. The upper part of the tree, which provides the fruit D. The lower part of the tree that is grafted in to the soil.

A 9. Which type of propagation methods does a part of the parent plant grow roots while still attached to it?
A. Air layering B. Grafting C. Seed propagation D. Stem cutting

C 10. Which type of irrigation system involves watering the crops through small pipes with emitters that releases water directly on the plant root zone?
A. Furrow irrigation B. Sprinkler C. Drip irrigation D. Flood irrigation E. none

B 11. Which of the following is an advantage of surface or gravity irrigation?
A. technical skill is required B. it requires low cost C. it requires level lands D. it saves water

D 12. One of the following vegetable is a good source of proteins, which one is it?
A. Sweet potato B. Carrot C. Tomato D. Immature beans

B 13. Vegetable production by small holder farmer in Ethiopia is Important because they are:-
A. Create job opportunities C. Contribute to national economy
B. Increased house hold income D. A & C E. all

E 14. The edible part of which of the following vegetables is their flower?
A. Cabbage B. Pepper C. Eggplants D. Celery E. none

A. The topography of the area should be gently slope
B. There should be a continuous and sufficient supply of water
C. There should be an adequate, dependable labour supply
D. It should be close to shade of trees or buildings

B 19. The seedling orchards are primarily established for the following purpose. Which one is it?
A. Commercial fruit production B. Seed production for root stocks C. Flower production D. Manure making

A 20. Which of the following is incorrect about the limitation of sexual plant propagation?
A. There is guarantee about genetic purity of plant
B. Identification of sex in seedling is not possible
C. Seedlings take more time to bear fruits
D Plants propagated sexually are large

D 21. In selecting planting material, what factors should be considered----------?
A. Adaptation to local conditions
B. Whether it meets the consumer demand in terms of product quality
C. Pests and diseases resistance
D. All E. A&B

A 22. A Warm season vegetables are adapted to temperatures ranging from ----------?
A. 18 -29 °C B. 16 - 27 °C C. 20-29 °C D. 20-30 °C

A 23. Which of the following soil particles have predominantly high level of pore space?
A. Sand B. Silt C. Clay D. All E. None

C 24. ---------- affects plant growth and development through its effect on plant transpiration from leaves?
A. Altitude B. Light C. Temperature D. Humidity

E 25. Which of the following is a major factor that affects the growth of vegetable crops?
A. Climate B. humidity C. light D. Altitude E. all

**Part II: - Match items under column A with items under column B**

| Column A | Column B |
|---|---|
| 26. Pome | A. Leaf vegetable |
| 27. Edible weed vegetable | B. Root vegetable |
| 28. Tender plant | C. Egg plant |
| 29. Radish | D. Amaranthus |
| 30. Celery | E. Indehiscent fruits |

26/30
V. good
