Blessed G/Michael Catholic Secondary School

First semester Agriculture Mid-Exam two for grade 12th

December, 2018 E, C **Number of questions: 30** **Time allowed: 40**

Name Hanna Aylew Section 12th C No 24

Part I: Choose the best answer among the given alternatives.

B 1. How should root and tuber crops be handled to minimize mechanical damage?
- A. By applying total dissolved salt and heavy metals
- B. Gently to minimize bruising and breaking of the skin
- C. Rough handling during harvest, storage and transport
- D. By exposing roots and tubers to direct sunlight and wind

D 2. In comparison to cereals, where do roots and tuber crops rank in terms of importance for energy sources?
- A. They are the most important
- B. They are equally important
- C. They are the least important
- D. they rank second to cereals

C 3. Which of the following statement is correct about cassava plants?
- A. Cassava is one of the most widely produced crops in Ethiopia
- B. Cassava cannot be converted in to livestock feeds
- C. Cassava is a crop grown in tropical and sub tropical regions
- D. Cassava is a permanent crop grown in temperate regions

D 4. Among the following, which country is the highest producing cassava crop production?
- A. Brazil
- B. Indonesia
- C. Democratic republic Congo
- D. Thailand

B 5. Which one of the following is the least spices producer's countries the world?
- A. Bangladesh
- B. Indonesia
- C. Turkey
- D. China

C 6. Which type of crops are the second valuable commodities next to fuel?
- A. Spice
- B. Tea
- C. Coffee
- D. Pulse crop

A 7. Which of the following crop is considered as king of spices?
- A. Pepper
- B. Ginger
- C. Cardamom
- D. Rosemary
- E. none

D 8. Which term best describes the primary causes of losses in root and tubers?
- A. Metabolic activities
- B. Mechanical damages
- C. Chemical imbalances
- D. Physiological disorders

A 9. What is the primary purpose of crop rotation in cultural control methods?
- A. Enhancing soil fertility
- B. Minimizing water consumption
- C. Disrupting pest life cycle
- D. Promoting specific crop growth

B 10. When should weeds be managed in the cultivation of root and tuber crops?
- A. Only during the harvesting season
- B. Before flowering and seed setting
- C. After flowering and seed setting
- D. Weed management is not necessary

D 11. What is the purpose of packaging in root and tuber crop storage?
- A. To increase weight
- B. B. To speed up respiration
- C. To encourage uniform stacking
- D. To protect the produce from damage

C 12. What characteristic makes roots and tubers more susceptible to spoilage?
- A. Low metabolic activities
- B. Resistance to physical damages
- C. Higher moisture content
- D. High starch and vitamin content

D 13. Which factor among the following is NOT an opportunity for root and tuber crop production in Ethiopia?
- A. favorable climate and soil diversity
- B. Proximity to markets in the Middle East
- C. Large and readily available workforce
- D. Extensive government support for farmers.

B 14. Why is Ethiopia referred to as the water tower of East Africa?
- A. Because its conditions are conductive to rainfall
- B. Because of the vast natural water bodies and rivers
- C. Because it has extremely limited water resources
- D. Because of its strict water conservation measures

A 15. Which country is the largest producer of cassava accounting for approximately 19% of the total global production?
A. Nigeria B. Indonesia C. Brazil D. Ethiopia

D 16. In which why do root and tuber crops help fill food gaps?
A. They are resistant to drought, which can occur during certain seasons.
B. They generate income for farmers, allowing them to buy other food items.
C. They are an excellent nutritious source o food for both human and animals.
D. They are harvested year-round and provide a backup when other crops are scarce.

D 17. Which of the following is a technical constraint of root and tuber crops?
A. High multiplication rates
B. Phytosanitary advantages
C. Abundance of planting material
D. Low dry matter content/yields

C 18. What part of Taro is commonly consumed as a cooked vegetable and made into pudding and breads?
A. Leaves B. Flowers C. Corms D. Stem

D 19. Which one explains why sweet potato is considered as an "insurance crop"?
A. It can be easily converted into a large number of beneficial products
B. It is staple food in Africa due to its adaptability to different climates
C. It has a high market value and can be used as a clean source of energy
D. It can be grown throughout the year under suitable conditions

C 20. What does biological control involves in the context of pest management for root and tuber crops?
A. Mechanical and physical control methods
B. The use of chemical pesticides to eliminate pests
C. Integration of living organism to control pest
D. Eradicating harmful insects by cultural control methods

B 21. Why are root and tuber crops, especially sweet potatoes, considered valuable in drought prone area?
A. they require a lot of water
B. they are resistant to drought
C. they contribute to flooding
D. They artificially generate rain

D 22. What are the economic importance of spice, coffee and tea?
A. Generate foreign exchange rate
B. Create employment opportunity
C. Source of in come
D. All
E. none

C 23. Which of the following factors is NOT essential for coffee production?
A. High humidity B. Well distributed rainfall C. Extreme heat D. Shade from taller plants

B 24. Which of the following countries the largest producers of coffee?
A. India B. Brazil C. China D. Ethiopia

D 25. Which of the following plants has rhizomes as its main stems?
A. Carrot B. Cassava C. Potato D. Ginger

Part II: - Match items under column "A" with items under column "B"

A	B
E 26. Cardamom	A. King of Spices
A 27. Black Pepper	B. the cherries are stripped off the branch
B 28. Strip picking	C. the red cherries are picked
C 29. Selective Picking	D. false Cardamom
D 30. Korerima	E. Queen of Spices

29/30
Excellent

First Semester Agriculture Second mid exam for Grade 12th

Name Hanna Ayalew Section 12th C No. 24.

1. B	7. A	13. D	19. D	25. D
2. D	8. D	14. B	20. C	26. E
3. C	9. A C	15. A	21. B	27. A
4. D	10. B	16. D	22. D	28. B
5. B	11. D	17. D	23. C	29. C
6. C	12. C	18. C	24. B	30. D
