Nov, 2018 E.C

Blessed G/Michael Catholic Secondary School
1st Semester Biology Test One for Grade 9th

Name ______________________________ Grade 9 Section ________ No ________

Time Allowed, 45 min'

I. Write true if the statement is correct or false if the statement is incorrect

1. Dichotomous keys are useful for taxonomists to classify unfamiliar organisms.
2. Biology is related to chemistry and physics during studying the process of photosynthesis.
3. The correct way of handling/ carrying/ microscope is holding with one hand only.
4. It is possible to taste and sniff chemicals in laboratory rooms.
5. In Symbiotic association between fungi and termite, fungi supplies extracellular hydrolytic enzymes.

II. Much The functions of each parts of microscope in column A with their functions in column B

A

6. Coarse Adjustment
7. Fine adjustment
8. Stage
9. Diaphragm
10. Condenser

B

A. Control amount of light reaching the specimen
B. Moves the stage slowly
C. Moves the stage fast
D. Hold objective lenses.
E. Keep the specimen in place.
F. Collect and focus light from the illuminator to the specimen

III. Choose the best answer from the given alternatives.

11. Which of the following apparatus is used to provide steam under regulated pressure?
A. Autoclave. B. Pressure cooker. C. Incubator. D. Hot oven.

12. The Person who divided the animals into two groups, those which had red blood and those that did not is....?
A. Whittaker. B. T.O. Diener C. Aristotle D. W.M. Stanley

13. Basis of classification according to Whittaker method of classification include:-
A. Cell Structure. B. Mode of reproduction C. Phylogenetic relationship D. All of these

14. Which of the following is included in Whittaker's classification?
A. Virus B. Bacteria C. Lichens D. Algae E. B and D

15. The Creator of Binomial nomenclature and the author of "Systema Naturae" is.....
A. Linnaeus B. Aristotle C. Darwin D. Lamarck

16. What type of reproduction does yeast use?
A. Sexual B. Budding C. Regeneration D. Conjugation

17. Protists are important to an ecosystem because they
A. Make oxygen B. Support food chains C. Recycle nutrients D. All of the above.

18. Fungi are important to an ecosystem because they are
A. Producers B. Regulators C. Decomposers D. Controllers

19. Which one is true about controlled experiment? It is an experiment which:-
A. Shows cause and effect in phenomenon.
B. Has one independent & dependent variable.
C. Shows the direct effect of the independent variable on the dependent variable.
D. All are true expressions.

20. Which of the following is non-hyphal fungus?
A. Yeast B. Muccor C. Rihzopus D. Mushroom

21. Which of the following organelles are used as appendages that aid the movement organisms?
A. Flagella B. Cilia C. Pseudopodia D. all

22. Which one of the following protists is a free living or does not cause any disease?
A. Amoeba B. Paramecium C. Plasmodium D. Giardia

23. Which method of reproduction is carried on by paramecium?
A. Budding B Sporulation C. Binary fission D. Multiple fission

24. Which of the following is not a difference of fungi from animals?
A. Fungi have cell wall but absent in animals C. Fungi are absorptive heterotrophs
B. Fungi are heterotrophs but animals are not D. are non-motile.

25. Fungi resemble plants because they
A. Have cell wall B. Are ~~non~~-motile C. Have centriole D. All of the above.

26. Fungi resemble animals because they are:-
A. Hetretrops B. Heterosporus C. Saprotrops D. Autotrophs

27. All except one is asexual method reproduction in fungi and other organisms.
A. Budding B. Sporulation C. Fragmentation. D. Conjugation.

28. Fung are different from animals because they ---
A. are non-motile B. are absorptive heterotrophs. C. has cell wall. D. All of the above

29. Mycelium consists of long cylindrical, tubular branched thread like filament called--
A. Hyphae B. Sporangium C. Rihzoid D. Spore

30. Protists are classified according to
A. How they obtain nutrients C. How they move.
B. How they grow D. How they reproduce

31. Which of the following Archea bacteria is aerobic in nature?
A. Halophiles B. Methanogens C. Thermoacidophiles D. None of these

32. During binary fission, which one is true about daughter cells?
A. It has one-half as many chromosomes as the parent cell.
B. It has the same number of chromosomes as the parent cell and is the same size as the parent.
C. It has twice as many chromosomes as the parent cell.
D. It has as many chromosomes as the parent cell, but is smaller in size.

33. Which type of nutrition method is common for both Monera and Protists?
A. Photo autotrophy B. Chemoautotrophy C. Heterotrophy D. All of them.

34. Which combination of organism and their cell wall is in correctly paired?
A. Cyanobacteria, Peptidoglycan cell wall C. Yeast, Chitin & polysaccharide
B. Cyanophyta, Cellulose cell wall. D. All are correct.

35. Write a scientific name of a plant endemic to Ethiopia.

36. Write the scientific names of three animals endemic to Ethiopia?

25

Name Abdlawi? solomon Grade 9 Section D No 40

1. true
2. true
3. false
4. false
5. true
6. C
7. B
8. E
9. A
10. A
11. A
12. C
13. D
14. E
15. A
16. B
17. D
18. C
19. D
20. A
21. D
22. B
23. C
24. [illegible]
25. A
26. A
27. D
28. A
29. A
30. A
31. D
32. D
33. D
34. D
35. Enset ~~Enset~~ ventricosum maize - zea mais
36. lion - Pantra leo
Elephant - Loxodonta
[illegible]
Wolf - [illegible]
